The number next to each word represents the value of correlation coefficient (from 0 to 1). The higher the value the more often these two words appeared close to each other.

The percentage distribution of emotions in the Bible.

ANALYSIS OF  
EMOTIONS  
IN THE BIBLE

We've divided the Bible into 100-word-long parts and counted the difference between the number of positively and negatively marked words in those fragments. Bars with values above zero represent parts where there were more positive than negative words and bars with values below zero represent the opposite situation.
